INSTRUCTIONAL DESIGN | AI ENABLEMENT & ADOPTION | eLEARNING & DIGITAL CONTENT | FACILITATION

Creative technologist and educator who builds learning content. Designed four eLearning courses in Articulate Rise and Storyline 360 and spent more than four years building interactive, animated digital content for national brands. Brings more than four years of teaching and instructional coaching, most recently creating and facilitating a nine-session AI learning series at Epsilon.

Professional Experience

Creative Technologist / Front-End Developer | Epsilon (Publicis) | Chicago, IL | Nov 2021 – Mar 2026

- Created and facilitated a nine-session AI learning series (2023–2026), starting with the Creative Technology team and expanding to art directors, copywriters, and other creative roles. Sessions moved from AI literacy to hands-on prompting, prototyping, and agent building, with Mentimeter activities for live participation.
- Designed and led a 60-minute hands-on workshop for 27 creative professionals; of 19 who answered a pre-session poll, only 3 had built an AI agent before. Participants who followed along each left with a working agent built for their own work, and leadership selected the materials for team-wide reuse.
- Turned a recurring bottleneck in a complex product-quiz workflow into a setup tool, a reusable code module, and a five-step implementation guide, cutting at least three days from the Creative Technology portion. Trained Creative Technologists on the process and helped project managers and art directors assess complexity before client conversations.
- Designed a shared AI coding workflow in Cursor for the Creative Technology team: a skills library seeded with three starter skills, framework-specific rules, and a pull-request process requiring human review of AI-generated code. Introduced it to the team through a walkthrough and live demo.
- Worked with art directors and project managers to turn visual concepts into interactive, animated ads for national brands including Lowe's, GM, Anthropologie, and Visionworks, built in JavaScript, CSS, and GSAP with decision-tree logic and up to 14 ad sizes.

Software Development Intern | JetClosing | Remote | Oct 2020 – Nov 2020

- Contributed React, TypeScript, and GraphQL features to an internal ticketing application alongside software engineers.

Education and Development Intern | Centro (now Basis Technologies) | Chicago, IL | Jan 2020 – Mar 2020

- Designed four eLearning courses in Articulate Rise and Storyline 360 on MEDDICC sales methodology, client communication, digital media, and customer success, each with assessments to check comprehension.
- Interviewed subject-matter experts to turn their expertise into structured learning content, and supported training events with the Education and Development team.

Online English Language Instructor | GoGoKid & iTutorGroup | Remote | Jan 2019 – Dec 2019

- Delivered individualized online instruction to adult and child learners, adapting lessons to different ages, proficiency levels, and goals.

English Language Instructor / Team Leader | Chungdahm Learning | Seoul, South Korea | Feb 2015 – Aug 2018

- As Team Leader for nine months, reviewed more than 300 hours of classroom footage for 11 instructors, built individualized coaching plans, and led weekly meetings on teaching quality and outcomes.
- Introduced a gamified, positive-reinforcement classroom approach that increased student engagement and was widely adopted by fellow instructors at the academy.
- Assessed more than 500 learners and adapted over 1,500 classes to individual needs and goals.

Independent Learning Project

Steady Under Pressure: Emotional Regulation at Work (2026)

- Designed a microlearning series on regulating stress at work, first built in Articulate Rise with custom code-built interactions; now rebuilding it in HTML and JavaScript.

Skills

Learning Design: Articulate Rise & Storyline 360, Microlearning, Learning Assessments, Job Aids & Implementation Guides, Workshop Design & Facilitation, SME Collaboration, Mentimeter
Digital Content: Interactive & Animated Content (GSAP), HTML5, CSS, JavaScript, React, Adobe Firefly
AI Tools: ChatGPT, Claude, Cursor, Google NotebookLM, Microsoft Copilot Studio, Microsoft Teams Agent Builder

Education

B.A. in International Studies, Loyola University Chicago | Minors: Economics, Spanish, Business Management
Web and Mobile Development Bootcamp, Epicodus (2020) | JavaScript, React, C#/.NET
