AI ENABLEMENT & LEARNING | WORKSHOP DESIGN & FACILITATION

Creative technologist and educator with experience designing and facilitating workplace AI learning for technical and creative colleagues. Created a nine-session AI learning series at Epsilon spanning AI literacy, prompting, prototyping, and agent building. Brings more than four years of teaching and instructional coaching, plus experience developing eLearning, implementation guides, and interactive digital tools.

Professional Experience

Creative Technologist / Front-End Developer | Epsilon (Publicis) | Chicago, IL | Nov 2021 – Mar 2026

- Created and facilitated a nine-session AI learning series (2023–2026), expanding from Creative Technology to art directors, copywriters, and other creative roles. Covered AI literacy, prompting, prototyping, and agent building, with Mentimeter activities for live participation.
- Designed and led a 60-minute agent-building workshop for 27 creative professionals. A pre-session poll found 3 of 19 respondents had built an AI agent before; participants who followed along each left with a working agent for their own work. Leadership selected the materials for team-wide reuse.
- Addressed a recurring product-quiz workflow bottleneck with a setup tool, reusable code module, and five-step implementation guide, cutting at least three days from the Creative Technology portion. Trained technologists and helped project managers and art directors assess complexity before client conversations.
- Designed a shared AI coding workflow in Cursor with three starter skills, framework-specific rules, and a pull-request process requiring human review of AI-generated code. Introduced the workflow through a team walkthrough and live demo.
- Partnered with art directors and project managers to build interactive, animated ads in JavaScript, CSS, and GSAP for national brands including Lowe's, GM, Anthropologie, and Visionworks.

Software Development Intern | JetClosing | Remote | Oct 2020 – Nov 2020

- Contributed React, TypeScript, and GraphQL features to an internal ticketing application alongside software engineers.

Education and Development Intern | Centro (now Basis Technologies) | Chicago, IL | Jan 2020 – Mar 2020

- Designed four eLearning courses in Articulate Rise and Storyline 360 on sales methodology, client communication, digital media, and customer success, with comprehension assessments. Interviewed subject-matter experts to structure learning content and supported training events.

Online English Language Instructor | GoGoKid & iTutorGroup | Remote | Jan 2019 – Dec 2019

- Delivered individualized online instruction to adults and children, adapting lessons to proficiency levels and goals.

English Language Instructor / Team Leader | Chungdahm Learning | Seoul, South Korea | Feb 2015 – Aug 2018

- As Team Leader for nine months, reviewed more than 300 hours of classroom footage for 11 instructors, developed individualized coaching plans, and led weekly meetings on teaching quality and outcomes.
- Introduced a gamified, positive-reinforcement classroom approach that fellow instructors adopted at the academy.
- Assessed more than 500 learners and adapted over 1,500 classes to individual needs and goals.

Skills

Learning: Workshop Design & Facilitation, SME Collaboration, Learning Assessments, Job Aids & Implementation Guides, Microlearning, Articulate Rise & Storyline 360, Mentimeter
AI Tools: ChatGPT, Claude, Cursor, Google NotebookLM, Microsoft Copilot Studio, Microsoft Teams Agent Builder
Development: HTML5, CSS, JavaScript, React, GSAP

Education

B.A. in International Studies, Loyola University Chicago | Minors: Economics, Spanish, Business Management
Web and Mobile Development Bootcamp, Epicodus (2020) | JavaScript, React, C#/.NET
